EXPERIENCE

Web Developer, Forio
San Francisco, CA   May 2017 - Present

- Lead developer for two projects, each generated over 100k.
- Release manager and backup release manager for at least 5 projects.
- Conducted interviews and trained junior developers; one of whom is now working with me on a larger scale project.
- Excelled at a highly fast paced environment, was a developer for at least 7 different projects and each project has a dev cycle of around 3-4 months.
- Provided technical support and resolving issues in calls with our clients.
- Overhauled an old, outdated project which was then sold to a client for an annual fee of about 50k.

Software Engineering Intern, Schoolzilla
Oakland, CA   September 2015 - Oct 2016

- Produced code utilizing RESTful API to merge company data into our databases resulting in reduce spending costs.
- Automated the conversion of over a hundred Tableau reports into png files, saving several days of work.
- Created SQL stored procedures and Tableau reports, converting a multistep process to 1.
- Resolved 2-6 tickets a day involving uploading raw files to fixing bugs.

IT Manager, Bay Area Dems
San Francisco, CA   June 2015 - March 2016

- Built both email templates and the organization website using HTML/CSS to attract and keep clients.
- Maintained contact lists containing over 200,000 contacts using the Salesforce platform.
